

Bottle-Matic II OS **Optical Sensing**

Included Add Ons:

- **Waste Rewind Unit** – This automatically rewinds the waste paper that is produced after labeling.
- **Automatic Bottle Sensor** – This allows you to insert your container and the machine automatically activates
- **Counter** – The counter allows you to see how many products have been labelled

The standard Optical Sensor is for opaque labels only, if labelling transparent labels a black registration mark will be required and an optional "black line" sensor fitted (special order lead time)

Weight: 15 kg

Dimensions: 540 x 450 x 200 mm
